Prolotherapy

Duration: 30 minutes

Components: Injection

Prolotherapy is an injection-based treatment for chronic musculoskeletal pain. A relatively small volume of an irritant or other sterile solution is injected at specific sites on and near painful ligaments and tendons. This draws immune cells and blood flow to the region, flushing out toxins, bringing in new nutrients and healing the tissues.

Trigger Point Injections

Components: Injection

When a muscle becomes tight, torn, or bruised, the point of origin for the injury is known as the trigger point. Trigger points are caused when a muscle becomes tight, torn or bruised, and can lead to headaches, migraines and other bodily pain. Treating the pain at the trigger point is highly effective, helping the muscle relax and reducing inflammation. After a trigger point injection, blood flow to the area improves, flushing toxins, lactic acid and debris from the area, and allowing nourishing and oxygenated fresh blood to perfuse.
